NetBox Enterprise
Rock solid network and infrastructure management – operate and scale with confidence

Transform Your Network and Infrastructure Management

Built on the trusted foundation of NetBox—the world's most widely deployed network source of truth—**NetBox Enterprise is a self-managed solution enhanced with advanced operational features, robust security, and deep integrations.** With push-button installation and upgrades, built-in backup/restore, and integrated SSO, NetBox Enterprise empowers you to take full control of your network and infrastructure management and automation—and it ships with rock-solid features and superior support.

NetBox Enterprise: Feature-Rich, Self-Managed, Fully Supported

- ✓ **Fully Self-Managed:** Push-button installation, upgrades, backup/restore, integrated SSO

- ✓ **Operational Excellence:** Streamlined lifecycle management with secure support bundles

- ✓ **Enterprise Integrations:** Connect with ServiceNow, Splunk, Ansible, Itential, Gluware, VMWare, & more

- ✓ **Collaborative, Auditable Change Management:** Approve changes with robust audit trails for compliance

- ✓ **Extend with Confidence:** Access certified plugins from the NetBox Labs ecosystem

- ✓ **Available Air Gap Edition:** Secure, fully disconnected operation with SOC2 Type II compliance

- ✓ **Rock Solid Support:** 24/7 assistance from the NetBox Labs team

What is NetBox?

NetBox is the world's most popular platform for documenting, modeling, and automating networks and infrastructure. Powered by a massive open source community, NetBox serves as the source of truth for tens of thousands of engineers— from growing organizations to Fortune 50 companies.

NetBox's comprehensive data model, robust APIs, and massive ecosystem make documenting and automating networks and infrastructure easy by bringing together all your data into a single cohesive system of record:

- Datacenter infrastructure management (DCIM)
- IP address management (IPAM)
- Circuit management
- And much more

PROVEN IMPACT

80% fewer IT help desk tickets

Experience operational efficiencies that matter. Customers leveraging NetBox Labs products—like Dartmouth College—have achieved up to 80% fewer IT help desk tickets.

Inside NetBox Enterprise: Advanced Capabilities for Self-Managed Success

netbox labs

Platform Architecture & Lifecycle Management

- **Self-Managed Deployment:** Enjoy push-button installation and upgrades, built-in backup/restore, and integrated SSO—engineered for predictable, secure operations

- **Scalable Architecture:** Manage hundreds of thousands of network and infrastructure elements, from small deployments to large enterprises

Comprehensive Data Model

- **Proven Framework:** NetBox is the de facto standard for documenting and automating networks and infrastructure—ensuring consistency and accuracy across your environment

Enterprise-Grade Change Management

- **Integrated Workflows:** Utilize end-to-end change management processes with granular controls for planning, review, and approvals

- **Audit & Compliance:** Maintain detailed logs and audit trails to support regulatory requirements and streamline governance

Integration & Ecosystem Connectivity

- **Seamless Integrations:** Out-of-the-box support for ServiceNow (CMDB & ITSM), Splunk, Ansible, Itential, Gluware, VMWare, and many others

- **Extensible APIs & Plugins:** Extend your capabilities with a massive ecosystem of certified plugins and integrations to connect smoothly with your IT stack

Security, Reliability & Support

- **Rock Solid & Fully Supported:** Benefit from high-frequency backups, automated failover mechanisms, and dependable, around-the-clock support from the NetBox Labs team

- **Secure & Compliant:** Meet stringent security standards with regular SOC2 Type II audits ensuring your environment remains secure

Expand Your NetBox Cloud Stack

NetBox Discovery

Map your networks and infrastructure, streamline documentation, and accelerate your automation journey. NetBox Discovery works seamlessly with NetBox Cloud to rapidly build your source of truth automatically from your existing infrastructure.

NetBox Assurance

Find and fix operational drift. Identify changes in your networks and infrastructure that deviate from your plans in NetBox, inspect and understand them, and quickly remediate them to eliminate risk and speed resolution.
